1. Introduction

The Coalition for Green Capital (CGC) is seeking proposals from qualified law firms licensed to practice law nationwide to provide legal counsel and other legal services needed for CGC's implementation of grant awards provided by the U.S. Environmental Protection Agency (EPA) under its Greenhouse Gas Reduction Fund (GGRF) programs authorized by the Inflation Reduction Act of 2022 (Public Law No. 117-169).

CGC has applied for nearly \$12 billion of grant awards under EPA's three GGRF programs to capitalize the first national green bank in the U.S. and expand CGC's existing network of state and local green banks and other community lenders. EPA has indicated it will announce its grant awards by March 2024, at which time CGC will immediately require the services described herein if it is selected by EPA. EPA has notified CGC that its applications are still under review for the National Clean Investment Fund (NCIF) and Clean Communities Investment Accelerator (CCIA). CGC is conducting this RFQ now to select third-party legal services provider(s) and to be ready by the time of an announcement by EPA.

CGC intends for this RFQ to result in the selected Respondent(s) executing Master Services Agreements, which will enable CGC's business units to, as needed, initiate distinct Task Orders for engaging the selected Respondent(s) for support on the grant-funded projects defined within the Task Order. Any agreements with Respondent(s) resulting from this RFQ will be contract agreements, not subrecipient agreements.

All federally funded programs and projects are subject to 2 C.F.R. Pt. 200. This procurement is following those standards.

2. Organization Overview

CGC is a 501(c)(3) nonprofit organization formed in Washington, D.C. whose mission is to accelerate the deployment of clean energy technology, reduce emissions of greenhouse gases and other air pollutants, and address climate- and energy-related environmental injustice. For more than a decade, CGC has advanced this mission by creating and implementing green bank finance institutions across the country that use public funds and proven financing methods to mobilize additional private investment in renewable energy, energy efficiency, and decarbonization technologies.

CGC currently operates as the American Green Bank Consortium (AGBC), which consists of over 40 green banks and financing entities across the country. CGC is also working with more than 20 startups motivated by the GGRF to create state or local green community lenders, covering more than 40 states across the country. Through strategic partnerships and innovative financing, CGC expands the reach of state and local green banks, community development finance institutions (CDFIs), and other finance institutions, to equitably drive accessibility to clean energy.

Green banks are mission-driven institutions that focus on financing rather than grants such that deployed capital is expected to be returned or repaid, and this helps to maximize the impact of each dollar that a green bank deploys. Because of this approach, green banks focus on markets where there is potential for some level of return on investment. This generally means proven, technically viable projects that are well past the research and development stage. Financing can also be done in tandem with other market development activities.

CGC has applied for multiple grants under EPA's GGRF programs to establish a national green bank—a centralized, long-term financing institution that fosters an ecosystem of green banks, community lenders, and community partners by providing capital and financing and co-investment opportunities to local entities across the United States. Further, CGC will invest directly in projects, activities, and technologies that reduce emissions of greenhouse gases and other air pollutants, particularly in low-income and disadvantaged communities, as well as rural and Tribal communities, and to accelerate progress toward the climate goals of the United States. By mobilizing capital in underinvested projects and communities, CGC will demonstrate

the market-wide opportunity for financial markets and institutions to finance clean technology projects, transform markets, reduce pollution, and benefit communities. For more information, please visit www.coalitionforgreencapital.com.

Attachment 6 – Sample Termination and Default

SAMPLE TERMINATION AND DEFAULT

SUSPENSION AND TERMINATION FOR DEFAULT

The Coalition for Green Capital, hereinafter known as the Contracting Entity, (“CE”) may suspend Firm’s operations under the contract immediately by providing written cure notice of any default. Suspension shall continue until the default is remedied to CE’s reasonable satisfaction; *Provided, however,* that, if after thirty (30) days from such a suspension notice, Firm remains in default, CE may terminate Firm’s rights under the contract. All of Firm’s obligations to CE shall survive termination of Firm’s rights under the contract, until such obligations have been fulfilled.

DEFAULT

Each of the following events shall constitute default of the contract by Firm:

- a. Firm fails to perform or comply with any of the terms or conditions of the contract;
- b. Firm breaches any representation or warranty provided herein; or
- c. Firm enters into proceedings relating to bankruptcy, whether voluntary or involuntary.

REMEDIES FOR DEFAULT

The Contracting Entity (“CE”)’s rights to suspend and terminate Firm’s rights under the contract are in addition to all other available remedies. In the event of termination for default, CE may exercise any remedy permitted by law.

TERMINATION FOR CONVENIENCE

The Contracting Entity (“CE”) may, for convenience, terminate the contract, subject to the following:

- a. Termination for convenience must be determined to be in the best interest of CE; and
- b. Firm must be provided with thirty (30) days written notice of the contract, unless CE has made a written determination that a shorter notice period is in the best interest of CE.

The termination for convenience shall not relieve CE from payment for goods and/or services already ordered as of the effective date of such notice. Firm shall provide all documentation to support any outstanding expenditures through the effective date of the notice of termination. CE may request additional documentation to support final payment.

Unless otherwise specified above, CE shall not have any further obligation or liability to Firm.

TERMINATION FOR LACK OF FUNDING

The Contracting Entity (“CE”) may terminate a contract if funds are not appropriated to CE or are otherwise not legally available for the purpose of making payments, without incurring any obligation for payment after the date of termination, regardless of the terms of the contract. CE shall provide Firm with thirty (30) calendar days written notice of termination, unless CE has made a written determination that a shorter notice period is required.

GENERAL TERMINATION PROCEDURES

After receipt of written notice of termination, Firm shall take all steps necessary to minimize waste, including:

- a. Stop work immediately on the terminated portion of the contract;
- b. Terminate all subcontracts related to the terminated portion of the prime contract;

- c. Perform the continued portion of the contract which is not terminated (if applicable);
- d. Take action to protect and preserve property in Firm's possession in which the CE has or may acquire an interest, and, if directed by CE, deliver the property to CE;
- e. Promptly notify the CE in writing of any legal proceedings resulting from any subcontract or other commitment related to the terminated portion of the contract;
- f. Settle outstanding liabilities and proposals arising out of the termination; and
- g. If there is a terminated construction contract, ensure the cleanup of the site, protection of serviceable materials, removal of hazards, and other actions necessary to leave a safe and healthful site.
